

- *Ranked #3 fastest growing networking company – Deloitte's 2009 Technology Fast 500*
- *Broad, Innovative Technology Product Portfolio*
- *Force10 Provides Solutions for Service Providers & Next Generation Data Centers*

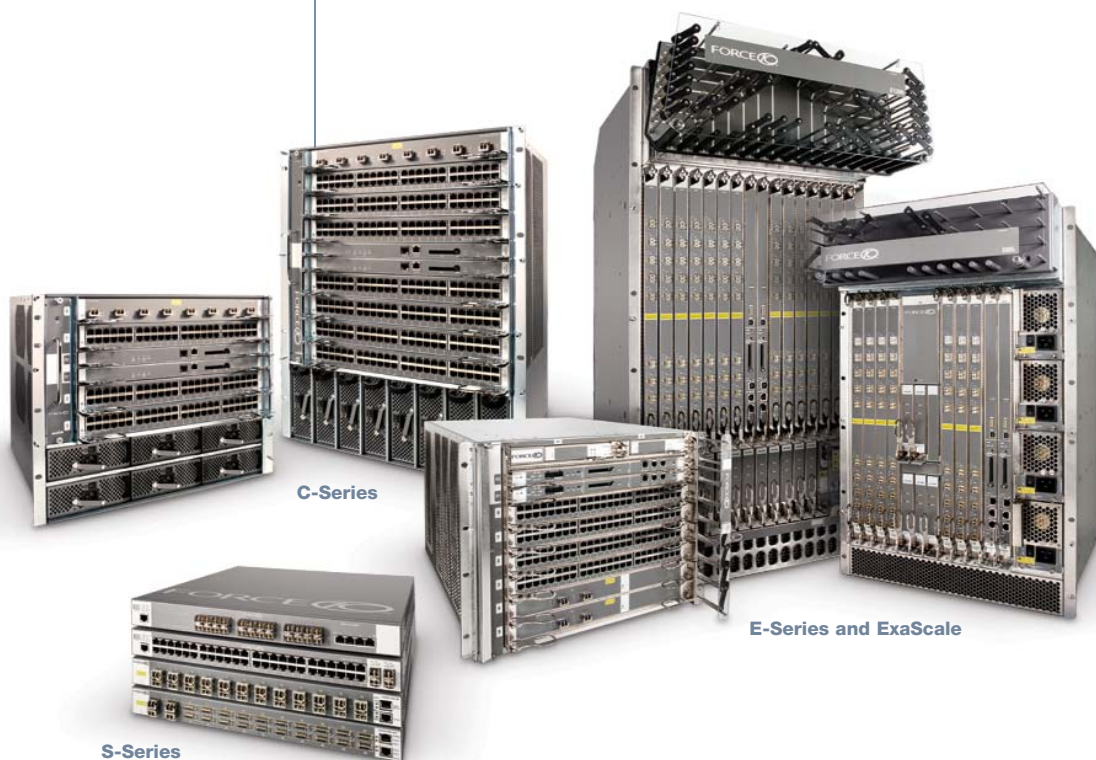

Solutions | Force10 Networks is the global technology leader that data center, service provider and enterprise customers rely on when the network is their business. The company's high-performance solutions are designed to deliver new economics by virtualizing and automating Ethernet networks.

Our award-winning Ethernet switching and routing products deliver unmatched port density and resiliency to help our customers deploy a high-availability, agile and standards-based GbE and 10 GbE data center network fabric, while reducing power and cooling costs. Force10's products combine the features of high performance hardware architectures that are purpose-built for non-blocking, line-rate throughput, with our modular Force10 Operating System (FTOS) software to deliver a unified end-to-end solution extending from the server and storage edge, to the network core and into the cloud.

Our ground-breaking approach to open, standards-based automation and virtualization allows customers to transform their network infrastructure into a self-optimizing, reliable and accountable cloud computing fabric.

We complement our family of Ethernet products with multi-service transport and access solutions, which diverse service providers deploy to support the delivery of a wide range of Ethernet/IP, SONET/SDH and TDM services in both metro and access networks.

Force10's professional services offerings augment our line of high performance Ethernet switches and routers. We offer a comprehensive array of network design, audit, deployment and other custom services designed to mitigate any installation-related issues and accelerate the timeframe in which data center and service provider customers can enjoy the resiliency, performance and scalability of their Force10 solutions.

- *World-class Service and Support*
- *Leadership Team Offers More than 150 years of Communication Industry Experience*

Markets and Customers | Force10 serves core markets with bandwidth-intensive data center applications including Web 2.0, social networking and gaming, cloud and traditional hosting providers, and supercomputing, that require the support of a high-performance, resilient and scalable network infrastructure. Ethernet has emerged as the networking technology of choice in these environments due to its cost-effectiveness, pervasiveness and increasing reliability.

Force10's customers include industry- and market-leading organizations with some of the world's most demanding network environments, including eHarmony, NYSE Euronext, Sega, Yahoo!, Novartis, and CERN among others.

Force10's solutions are available worldwide through our direct sales force and channel partners. Our indirect sales channel, comprised of resellers, distributors and system integrators, is supported by a dedicated sales force with broad experience in selling high performance network infrastructure equipment through distribution partners.

Service and Support | Force10 provides 24x7 on-line, telephone and on-site service and support capabilities to our customers operating in more than 60 countries worldwide. With Technical Assistance Centers (TAC) and spare depots around the world, Force10 combines advances in service and support technology with technical expertise to support customers from the planning and design phases through installation and long-term operation.

Customers have unlimited access to TAC at Force10. TAC engineers are all internetworking experts, who are experienced in supporting large data center, enterprise and service provider networks. Force10's innovative process and CRM infrastructure facilitate automatic case routing to the appropriate expert based on customer and subject matter, resulting in faster and smoother problem resolution of their network issues.

Corporate Overview | Force10 Networks is led by a seasoned, best-in-class management team that is steeped in network industry expertise and experienced in building global businesses.

With its headquarters located in San Jose, California, Force10 has more than 600 employees with about one third engaged in research and development and related engineering activities. Research and development is carried out in the United States and India.
